

Services

Pricing:

When we started [Atlanta Multimedia](#) we thought of so many ways of coming up with a price list so people have a better Idea of how much a particular project would cost. With each project being different from the next we have found it near impossible to give out prices until the scope of the project is defined. It would be easy to come up with a general list but when we started it everything started leaning toward creating a more generic product witch was exactly what we where trying to stay away from.

When meeting with our clients we work hard to satisfy their expectations and budget based on the project they want to build. When going over a project with a client we like to inform them on their investment and give suggestions on improving the idea.

Marketing:

Marketing has become a new service that [Atlanta Multimedia](#) has started to provide our customers we now take a detailed look at search engine placement and on line marketing research to bring our clients the traffic that their business needs. By using doorway pages multiple domains and on line placement databases a website has a much better chance of becoming a large part of your incoming business.
